

# Lone Worker Solution

lone worker

## Lone Worker Solution

The Lone Worker Solution provides complete duty of care for your mobile lone workers.

The software can be enabled on smartphones as a cost effective solution or by applying to a discreet lanyard i.d. tag. This solution will help to comply with all the essential aspects of a 'lone worker' device as outlined in the BS8484 Category 2 guidance for lone workers

## The Benefits

The Lone Worker Solution has many cost and performance benefits which include:

- Discreet deployment to avoid aggravating the situation
- Ease of use to ensure rapid response
- Low cost implementation
- Compliant to 'duty of care' regulations
- Can help to avoid lengthy and costly court cases
- Provides excellent evidence for convictions

## The System

The Lone worker solution can utilise existing handsets as well as more discreet deployment. The devices have the following specifics:

- A designated panic button when pressed opens an audio channel to a 24/7 monitoring centre
- An amber alert key can be used to record a users whereabouts
- Device protects against Environmental risk with 'man-down' alarm
- The solution allows the device to be located by the alarm receiving centre within 5 metres.
- With handsets, staff can receive scheduled automated calls to check they are safe
