

Vehicle Tracking Solution

Vehicle Tracking Solution

The vehicle tracker solution provides total visibility of a mobile workforces activity.

This empowers any business with the ability to identify, measure and target key areas that can impact on operational cost, business productivity and duty of care compliance.

The Benefits

The vehicle tracking solution has many cost, performance and legal compliance benefits which include:

- Reducing fuel costs
- Avoiding inaccurate expense claims
- Increasing efficiency & productivity through less wasted journeys
- Reducing your carbon footprint
- Providing greater security for some of your most expensive assets
- Complying with duty of care by knowing where your staff are at all times
- Creating useful business analysis reports
- Improving profit through savings

The System

The vehicle tracking solution uses hardwired GPS units, with a tamper proof system, driver ID function and remote immobilisation.

The functions of this solution include:

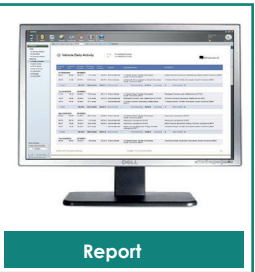

- View your workforce on one map
- View speed and stop durations of staff
- Assign closest worker to job
- Receive geo-fencing and speeding alerts
- Monitor planned versus actual routes driven
- Full reporting suite
- Create comprehensive time sheet reports
